V6-200/240/280-C

Technical description:

Engine block and head

- Aluminum, deep skirt cylinder block with six bolt, powdered metal main caps for extra strength
- Hydraulic cam phaser for variable camshaft timing optimizes low end torque and highend horse power

Lubrication system

- Pressure lubrication system with heavy duty engine oil cooler and remote oil filter
- Paper oil filter element reduces environmental impact of engine service
- Cast aluminum structural oil pan

Fuel system

- Spark Ignited Direct Injection system with stainless steel returnless fuel rail and highpressure mechanical fuel pump
- High pressure direct injection facilitates a higher compression ratio and improved combustion
- Vapor separating fuel pump system with two electric pumps, pressure regulator, and water separating fuel filter

Intake and exhaust system

- Low weight aluminum exhaust system
- Three inch riser option is a direct replacement for the standard height elbow

- · Exhaust passages optimized for torque and
- Collector (elbow) design maximizes use of the catalyst for reduced back pressure

Cooling system

- Freshwater (closed) cooling system for engine and engine oil cooler
- Advanced Volvo VCS (yellow) coolant for superior corrosion and thermal protection

Ignition system

- Iridium tipped, side electrode spark plugs for reliability and extended service life
- Coil near plug ignition system

Electronic engine control

- Electronic Control Module (ECM) ensures constant, optimum performance, greater fuel efficiency and reduced emissions
- 4G ECM supports full diagnostics through connection on engine harness
- Closed loop system with pre- and post catalyst oxygen sensors helps control fuel delivery and reduce emissions

Electrical system

- 12V corrosion-protected electrical system
- 75A marine alternator with internal transistorized voltage regulator
- Re-settable circuit breaker for trim system
- Fuse protection of the electric fuel pumps and the fuel injection system

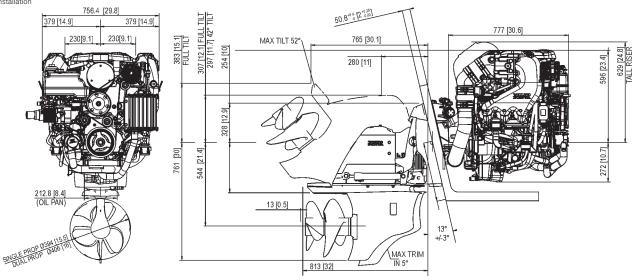

Drive

- Cone clutch for smoother shifting
- Pattern-matched spiral bevel gears
- Exhaust through propeller hub, cavitation plate
- Break-away coupling between vertical shafts
- Standard tilt specification 52° (42° and 32° available as option on engine order)
- The drive can be turned 28° in each direction
- Built-in kick-up function to reduce damage, in the event the drive strikes an underwater
- Easy access drive and transom shield anodes

Power trim

High capacity trim pump integrated with transom shield to ease installation and save space in engine compartment

Dimensions V6-240/DPS

Note: Power and fuel consumption measurements according to ISO 8665. Fuel octane of 90 RON (87 AKI) with 0% ethanol and density of 742g/liter, air temperature at 25°C (77°F), humidity of 30% and barometric pressure at 100 kPa (14.5 PSI). Operation at different conditions will influence engine power output and fuel consumption.
